

Portfolio Statement

Spictal design is in **emtry space**.In this space, you must **take a suit place for user**.Some which can be used such as **furniture, flooring,shape** or anther things.Also they can **create a new feeling in this space**.And also think about that user how they want to use this area.In this area **can make what mood to feel it**.I think mood is important things.Because mood **can make user's different feeling**.Some facilities,for example,hospital. It must have a quite and clearly.That means **some important things have “rules” for mood**.It can't correct it.So I think mood is impartment.
